

Please reject NAB's petition 04-160. I gladly pay my subscription fees to XM Radio to be able to here uncensored content in my music and talk radio. I pay a premium to hear any format available to me free of commercials and advertisements and I firmly believe that it is my right to hear all and future content made available to me without restrictions of any kind. Restrictions are for public broadcast radio that relies on fees paid by advertisers. Just like cable TV, I expect to watch whatever I want, when I want. I pay, therefore I have the right to view and listen without interference.

Respectfully,  
Terry Norris
